

Unsupported Operating Systems

Microsoft no longer supports **XP and earlier** operating systems.
Apple no longer supports **OS X 10.7 Lion and earlier** operating systems.

We strongly recommend ordering from a computer with a supported system. Unsupported operating systems do not receive updates. This may leave them **vulnerable to security issues and performance problems**. It may also cause them to become incompatible or unpredictable at some point, since ROES software and its supporting language, Java, are both updated regularly.

Based on your Operating System, **update your Java** before downloading Pro Filmet ROES:

<http://java.com/en/download/manual.jsp>

[Find out which operating system you have.](#)

DOWNLOAD Pro Filmet ROES

If you need to use an unsupported system, please use this launch.

<http://www.roeslaunch.com/ROES/labs/ProFilmet/launch1G.jnlp>

If you have any questions about Pro Filmet ROES, contact Filmet's Customer Service Department at 724-275-1700 for assistance.
